Ramco Systems announces the launch of Aviation Software 6.0 for smarter aircraft management

Specialized Engine MRO solution and key AI enhancements to drive transformation in M&E and MRO operations

Chennai, INDIA – September 10, 2024 – Global aviation software specialist, **Ramco Systems** announced the release of version 6.0 of its Aviation Software – a revolutionary product release designed to transform M&E and MRO operations with AI-driven insights, advanced automation, and seamless integration. An integrated solution with modules for Contracts, Engineering, Planning, Maintenance, Supply Chain Management, Finance, ePUBS and advanced mobility capabilities, Ramco Aviation Software 6.0 is built to handle the challenges of tomorrow.

The release introduces many unparalleled features that enable organizations to digitally transform their maintenance execution processes, as well as their management of flight safety, materials and commercials, with some of the key features and modules including:

- **Engine MRO Module:** A cutting-edge module designed exclusively for Aviation Engine Maintenance, Repair, and Overhaul (MRO) operations, providing unparalleled precision and efficiency in engine maintenance management
- **Maintenance Control Centre (MCC) Hub:** To facilitate seamless operations, and provide MCC personnels with the capability to review aircraft readiness for upcoming schedules
- **Aviation Material Requirements Planning (MRP) Module**: A proprietary module to enhance organization's planning and optimization capabilities through optimization of resource allocation and scheduling
- **Graphical Quote Comparison Tool:** To streamline decision-making process for purchases, and enable organizations with useful insights that help determine the best option
- **Purchase Automation Framework:** A robust framework that streamlines purchase order management with a one-time setup of automation rules
- **Enhanced Pricing Solutions:** The addition of enhanced capabilities to its pricing solutions, to enable organizations streamline billing and invoicing

> **Ramco Aviation Software 6.0 empowers organizations to:**
>
> - **Prevent unexpected failures** with precision management of parts
> - **Streamline documentation processes**, making compliance a breeze
> - **Stay ahead of issues** with predictive analytics, reducing unplanned downtime
> - **Enhance operational efficiency** with automated workflows and advanced material allocation
> - **Optimize supply chain**, cutting costs and boosting productivity
> - **Embrace digital transformation** for seamless MRO experience.

Sundar Subramanian, Chief Executive Officer, Ramco Systems, said, "The latest version of Ramco Aviation Software 6.0 is a significant milestone in our journey of continuous innovation and commitment to excellence. Along with the advanced capabilities, our specialized Engine MRO solution is a key part of this release, addressing the critical challenges of engine maintenance. By harnessing advanced technology and our domain expertise Ramco Aviation Software 6.0 will enable aviation organizations meet their growing customer demands and stay competitive. We look forward to empowering organizations drive transformation with this game-changing release."

Manoj Kumar Singh, Chief Customer Officer – Aviation, Aerospace & Defense, Ramco Systems, said, "We are incredibly proud to bring Ramco Aviation Software 6.0 to our customers. Our relentless focus on innovation has helped us build this AI-powered solution that not only addresses the current challenges faced by aviation organizations but also anticipate their future needs. With advanced capabilities such as automated workflows,

data-driven decision making, optimized supply chains, and specialized modules like Engine MRO, we believe we are setting new industry standards with Ramco Aviation Software 6.0."

Ramco Aviation Software is trusted by 24,000+ users to manage 4,000+ aircraft globally. With 90+ Aviation organizations onboard, Ramco is the solution of choice for top Airlines, 3rd party MROs, large Heli-Operators, leading Defense organizations, and major Urban Air Mobility companies around the world. Available on cloud, Ramco Aviation Suite provides accessibility with 'Anywhere Apps', significantly accelerating organizational efficiency and agility. Ramco is changing the paradigm of enterprise software with Artificial Intelligence based solutions, intelligent voice enabled user experience, and advanced features such as digital task cards, offline maintenance capability, conversational chatbots, HUBs and cognitive solutions.

About Ramco Systems:
Ramco Systems is a world-class enterprise software product/ platform provider disrupting the market with its multi-tenant cloud and mobile-based enterprise software, successfully driving innovation for over 25 years. Over the years, Ramco has maintained a consistent track record of serving 1000+ customers globally with 2 million+ users, and delivering tangible business value in Global Payroll, Aviation Aerospace & Defense, and ERP. Ramco's key differentiator is its innovative approach to develop products through its revolutionary enterprise application assembly and delivery platform. On the innovation front Ramco is leveraging cutting edge technologies around Artificial Intelligence, Machine Learning, RPA and Blockchain, amongst others, to help organizations embrace digital transformation.
